Technical Skills: SQL, Python, Excel, Power BI (DAX), Tableau, Alteryx, R, Microsoft Fabric, Databricks, KNIME, Data Modeling (Star Schema), ETL Pipelines, Data Visualization, Regression & Predictive Modeling, Statistical Analysis, AWS, Jira, Agile Development

Certifications: AWS Cloud Technical Essentials, Tools for Data Science, Python for Data Science, AI & Development

EXPERIENCE

Epic Sales Partners

Data Analytics Consultant

Irving, TX

Jan 2026 – May 2026

- Led a 4-person team to build a broker contract analytics platform for a \$1B+ retail food brokerage, using 10 years of shipment and commission data to model vendor performance and provide C-Suite visibility into broker relationships
- Engineered a Python pipeline to extract and standardize 500+ broker agreements across 3 product categories from PDFs, outputting a star schema covering commission, retailer networks, zone coverage, and contract metadata
- Developed an executive Power BI dashboard with DAX measures and What-If parameters linking contract metadata to financials, creating visibility into vendor performance against targets across the initial 90-day revenue lifecycle

Revature

Business Systems & QA Analyst

Reston, VA

Sep 2024 – May 2025

- Owned creation and prioritization of 15 user stories per sprint for customer-facing features; aligned backlog with business goals across 12 sprints, maintaining a 98% on-time delivery rate
- Analyzed 500+ usability assessments, surfacing insights that influenced feature prioritization decisions and contributed to a 50% reduction in user drop-off
- Improved defect logging and capture by 98% through structured root cause analysis and Jira-based tracking workflows, strengthening visibility across QA, development, and product teams
- Automated recurring data collection and centralized performance reporting on AWS, reducing QA cycle time by 40% and cutting manual reporting overhead by 72 hours per week for a team of 10

Qualinfotech Solutions Inc.

Data Analyst

Dallas, TX

Aug 2022 – Sep 2024

- Audited 30,000+ records across 3 databases using SQL to surface duplicate entries and errors; implemented validation rules and process improvements that increased data accuracy by 15% and cut executive reporting errors by 30%
- Built a Python ETL pipeline validating data across 3 source systems, resolving 20+ schema mismatches; reduced manual data preparation time by 35% and migrated cleanly from Excel to AWS DocumentDB

PROJECTS

MLB Scouting & Roster Intelligence Platform

Oct 2025 – Dec 2025

- Designed a normalized relational database of 5,000+ MLB and minor league players spanning 5 league levels, and built an analytics dashboard with 15+ filterable metrics across player type, season, league level, team, and position
- Developed an AI scouting assistant (RAG via Chroma) with natural-language-to-SQL querying to evaluate trades, call-ups, and roster construction across all 30 MLB organizations

Workforce & Traffic Analytics Suite

Oct 2025 – Dec 2025

- Built an Alteryx pipeline consolidating 3 years of fragmented HR and salary data into a 3,100+ record Tableau extract; designed dashboards surfacing compensation gaps by gender and age, and PTO disparities by tenure
- Applied K-means clustering to segment employees by compensation and tenure and visualized \$4.7B in TxDOT road delay costs by district, revealing pay equity gaps and infrastructure priorities
